

Enterprise Legacy System Application

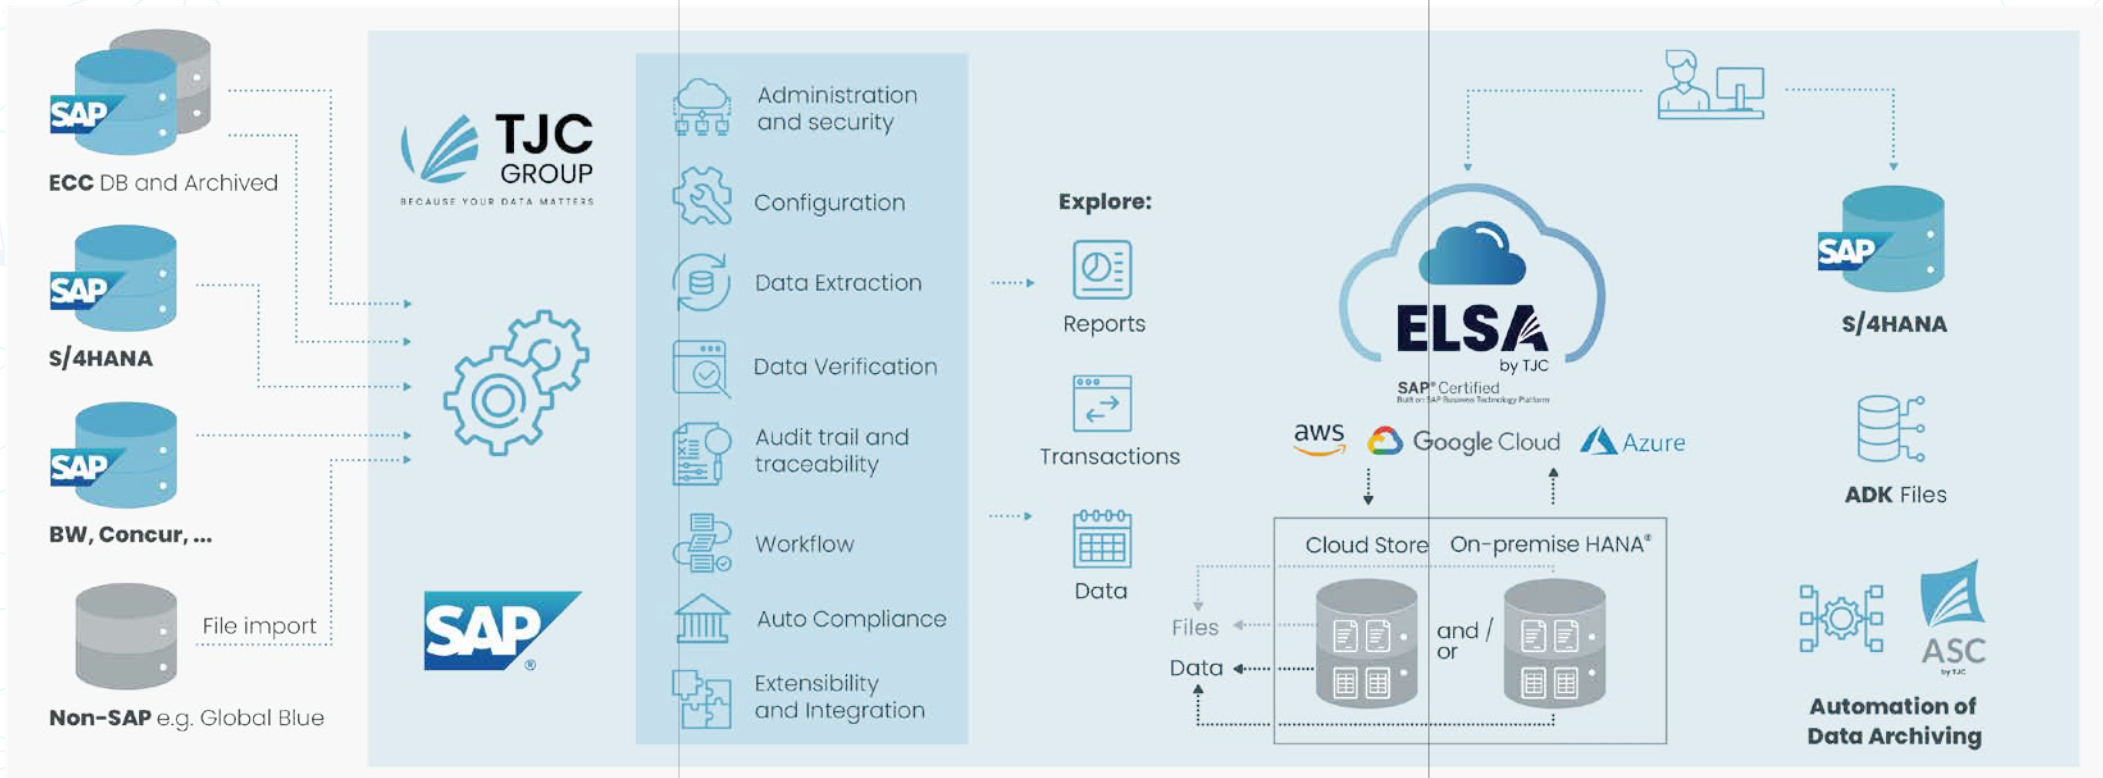

The SAP Certified solution for System Decommissioning

Accelerate your **S/4HANA** and **RISE with SAP** projects by ensuring legacy data from SAP and non-SAP systems remain accessible, secure, and compliant.

ELSA transforms the complexity of managing multiple legacy systems into a streamlined, unified approach that accelerates your digital transformation journey whilst maintaining complete data integrity and regulatory compliance.

MAIN FEATURES

- 1. One platform.** Centralized management of all legacy systems after migrating to SAP S/4HANA.
- 2. Comprehensive data access.** Search and retrieve documents, reports, transactions and queries in their original formats and languages.
- 3. Highly customizable.** Adapt menus, queries, extraction formats and reports as per your needs.
- 4. Advanced visualization.** Utilize dynamic report graphics or original financial reports to quickly discover insights.
- 5. Robust security.** Manage user authorizations, enable single sign-ons, apply data masking, and track detailed activity logs.
- 6. Seamless integration.** Visualize legacy data via Fiori App directly from SAP S/4HANA.
- 7. Audit-ready data.** Generate comprehensive audit reports to validate extracted data.

WHAT IS ELSA

ELSA by TJC is an SAP-certified solution built on SAP BTP for system decommissioning. It centralizes access to archived, legacy, and live data across multiple systems, ensuring compliance with tax regulations and data privacy laws such as GDPR—whilst reducing costs and complexity during **S/4HANA** migration.

WHY ELSA

- **Long-term data access.** Preserve the quality and availability of historical data whilst offloading your live SAP S/4HANA system.
- **Full system visibility.** View all decommissioned SAP and non-SAP historical legacy data through one legacy systems directory.
- **Future-proof compliance.** Securely manage data to meet evolving tax, audit, and data privacy requirements.

KEY BENEFITS

Choose your tech

Deploy ELSA on your preferred hyperscaler (AWS, Azure, Google Cloud and others) and storage technology (on-premise or cloud databases).

AI-ready

Leverage high-quality historical data to train AI models, power analytics, and support SAP-integrated AI use cases.

Stay compliant

Extract 100% of your data with integrity for audits, tax, and data privacy regulations.

Cut costs

Decommission legacy systems and achieve up to 80% savings in total cost of ownership.

Retain legacy data

Maintain access to all legacy contents from one cloud application to address business needs, HR data, or tax and audit requirements.

Reduce risk

Consolidate all data in one secured, integrated repository fully prepared for audits, tax, and privacy requirements.
